

NCCWSC CLIMATE CHANGE SCIENCE AND MANAGEMENT WEBINAR SERIES

A partnership between the
National Climate Change and Wildlife Science Center (NCCWSC)
and the U.S. Fish and Wildlife Service's National Conservation Training Center (NCTC)

“Geo Data Portal: Translating Climate Data for Geographic Analysis”

Wednesday, August 29, 3:00 PM Eastern

*Nathaniel Booth,
Lead Architect and Program Manager,
U.S. Geological Survey Center for Integrated Data Analytics (CIDA)*

And

*Adam Terando,
Climate Scientist and Research Coordinator,
North Carolina Cooperative Fish and Wildlife Research Unit, North Carolina State University*

Description: Landscape studies of climate change impacts often require a large range of data products and processing. The Geo Data Portal (GDP) was developed with support from the NCCWSC in response to the wide practice in environmental modeling of accessing and processing climate model data. The GDP platform assists scientists and resource managers in accessing and using downscaled climate projections and other modeling resources. The GDP provides easily downloadable calculations and information for various regions, climate factors, and time periods of interest. These capabilities will be described during this webinar, along with future plans for disseminating other relevant data products across the NCCWSC and Climate Science Center network.

YOU MUST REGISTER TO JOIN THIS WEBINAR

<https://doilearn.webex.com/doilearn/k2/j.php?ED=141465122&UID=1142597817&HMAC=e1ce68aa1b56c0de1e3050fa42a949caedeab004&RT=MiMxMQ%3D%3D&FM=1>

Once submitted, your name will be added to the registry for the webinar and you will receive an email with instructions on how to join the webinar via WebEx platform.

THIS WEBINAR WILL BE RECORDED

If you cannot attend the webinar it will be posted approximately 1-2 weeks after the presentation is given and posted on the NCCWSC website: <https://nccwsc.usgs.gov/?q=webinar/114>

CLOSED CAPTIONING WILL BE PROVIDED

Instructions will be sent once registered.

UPCOMING NCCWSC WEBINARS
